EXAMINER'S STATEMENTS OF REASONS FOR ALLOWANCE

1. Claims 1, 2, 7, 8, 10, 13-17, 21-24, and 29-31 are allowable over prior art because related references do not disclose generating signal segments REVERB and SEGUE using an initial pattern that minimizes pilot tone phase offsets and a symbol synchronizer for zeroing out a signal stream from an input of a timing recovery circuit when a cyclic prefix is present in the signal stream. Claims 11, 12, 25, 26, and 28 are allowable over prior art references because related references do not disclose removing the cyclic prefix from a signal and detecting an average pilot phase error using a DFT, and applying the average pilot phase error to the input of a timing recovery circuit to create a frequency correction signal.
